exactly how do animals affect the quality of life of their human
companions the 7th international conference on animals health and
quality of life set out to explore this question a major result of
this quest was companion animals in human health a careful
selection of jurored and invited papers from that conference the
articles in this volume address human animal interaction hai
according to the elements that define quality of life physical
mental emotional and social health functional health and general
well being beginning with an overview of human animal interaction
from historical and value perspectives the authors develop a
conceptual framework for hai research and quality of life
measurement they then go on to explore the psychosocial and
physiological impact of hai the concluding sections address the
role of companion animals in human development and the training
and welfare of animals in therapeutic programs

comfort during resting half closed eyes when feeding on highly
palatable feed or vigorous tail wagging when being brushed are
some of the positive indicators that can be used to evaluate the
quality of the environment in which domestic animals live this has
been a radical shift from the past as until now the welfare

assessment on farms has meant assessing negative indicators namely the number of lame animals presence of lesions or frequency of agonistic behaviours however the latest research confirms that the absence of a problem or of suffering does not necessarily imply that the animals are experiencing a good life and that their level of welfare is high to guarantee high welfare standards animals should experience positive conditions that allow them to live a life worth living and positive indicators are needed to identify these conditions this special issue focuses on the development and validation of indicators of positive welfare or on the refinement of the existing ones as well as on the identification of suitable living conditions for providing positive welfare to farmed and companion animals
